I'm a 21 years old bloke from Leppävaara, Espoo and a soon-to-be full-stack developer. Currently back in school for my second year after a brief visit to the grays of the army. Majoring in Computer Science at Aalto University and minor in Business Studies. On the side of the studies I'm working for MentorAid Oy as a part-time software developer. In the school project for an acceleration program StartUp Sauna I got a glimpse into modern software development while applying Scrum, ReactJS and Node.js – and I'm loving it.

Skills

- Fluent in Finnish and English
- Experience in working with Scrum
- Modern frontend technologies (ReactJS, HTML5, JavaScript, CSS)
- Modern backend technologies (Node.js, Express.js, SQL, PHP)
- Anxious to learn new
- The Let's make it happen -attitude

Experience

AUGUST 2014 ->

Software Developer / MentorAid Oy, Espoo

Responsible for updating, maintaining and developing the deep learning and video hosting platform on a project-based schedule. Worked with WordPress, JavaScript, PHP, HTML, Linux, CSS, C# ...

MARCH 2017 – DECEMBER 2018

Shop Assistant / Henkilöstöratkaisu Extraajat Oy, Helsinki

Rental worker in a variety of positions in grocery stores on the side of the military service and studies.

Education

2015 ->

Bachelor's in Computer Science / Aalto University, Espoo

Currently working through the second year with 92/180 study points and the running average at 4.8/5. Majoring in Computer Science and Engineering and minoring in Business Studies.

JUNE 2017

Sub officer course / Salpauselän Ilmatorjuntapatteristo, Vekaranjärvi

Finished with the rank of a sergeant and as the valedictorian of the course.

JUNE 2015

Upper Secondary School / Etelä-Tapiolan lukio, Espoo

Graduated with 4 Laudaturs and 2 Eximia cum laude approbatur.

Activities

In life I try to enjoy the little things like cooking, having wintery walks with my girlfriend and sipping whiskey, knitting and listening to music in the evenings. One of my affections is sports. Usually it's playing soccer, jogging or working out at the gym but also stuff like frisbee golf, tennis, ice hockey, cross-country skiing and sometimes even rock-climbing or badminton. Software is also a part of my free time since the sudden fixation with software in high school. I like trying out new technologies while trying to create something useful. For instance, I have made a mobile app for frisbee golf with which you can share your score with friends, a Weight Watchers' Points calculation application for my mom and a simple arcade game with a friend of mine.
